SUMMARY

Frontend Engineer with 4+ years of experience building scalable web applications using React.js, Angular, and TypeScript. Skilled in responsive UI, REST API integration, reusable components, Redux, NgRx, RxJS, and frontend performance optimization, with results including 35% faster load times and 20–30% fewer redundant API calls.

EXPERIENCE

Blump Tech Private Limited
Frontend Engineer

July 2022 – Present
Delhi, India

- Developed 10+ production web applications in React.js and Angular with TypeScript, REST API integration, token-based authentication, HTTP interceptors, and cross-browser support.
- Built reusable, responsive, WCAG 2.1 AA accessible UI component libraries with designers and backend engineers, reducing repeated frontend effort by 30%.
- Optimized Core Web Vitals and reduced redundant API calls by 20–30% using code splitting, lazy loading, tree shaking, and RxJS caching with shareReplay and TTL.
- Implemented Redux, NgRx, and RxJS state management to deliver predictable data flows across dashboards and product workflows.
- Collaborated cross-functionally with product managers, designers, and backend engineers while writing unit tests with Jest, Karma, and Jasmine targeting 80%+ coverage on critical modules.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University
B.Tech in Computer Science and Engineering, CGPA: 7.31

2018 – 2022
Lucknow, India

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Frontend: React.js, React Hooks, Context API, Angular, Next.js, Redux, NgRx, RxJS, Angular Material, Bootstrap, Tailwind CSS, Figma

UI / Performance: Responsive Design, WCAG 2.1 AA, Cross-Browser Support, Reusable Components, Storybook, Code Splitting, Lazy Loading, Core Web Vitals, Lighthouse, OnPush Change Detection

Testing / Tools: Jest, React Testing Library, Cypress, Karma, Jasmine, Webpack, Vite, npm, ESLint, Prettier, Git, GitHub, GitLab, Agile, Scrum, CI/CD

Backend Exposure: Node.js, Express.js, REST API Design, JWT, MongoDB

PROJECTS

TheSwapp | Church Ministry Platform, Live on AWS

December 2025

- Owned the complete Angular 13 frontend for a multi-tenant platform with role-based dashboards, tenant-isolated views, reusable Bootstrap components, route guards, and lazy-loaded modules.
- Contributed to backend development using Node.js and Express.js for REST APIs, MongoDB/Mongoose models, JWT-secured endpoints, Joi validation, and Helmet-based security hardening.
- **Tech:** Angular 13, TypeScript, Bootstrap, Node.js, Express.js, MongoDB, Mongoose, JWT, Stripe, Google Maps APIs, jsPDF, Twilio, Nodemailer, Moment.js.

CQ Servicing | Multi-Tenant Lending Platform

August 2025

- Built frontend modules for a multi-tenant lending platform serving 18 institutions with dashboards, configurable workflows, tenant-isolated views, reporting screens, and approval workflows.
- Implemented loan lifecycle screens, document handling, PDF generation, Excel exports, analytics dashboards, and calendar workflows, improving loan processing efficiency by 40%.
- **Tech:** Angular 14, TypeScript, RxJS, Angular Calendar, Ngx-Charts, ExcelJS, PDFMake, Docxtemplater.

WellCare Health | Healthcare Platform

February 2025

- Led frontend delivery for patient, provider, and admin workflows with responsive screens, reusable UI patterns, role-based access, route guards, form validation, and REST API integrations.
- Implemented RxJS data flows, Firebase Storage uploads, Chart.js dashboards, lazy-loaded modules, OnPush change detection, and route-level code splitting, reducing initial load time by 35%.
- **Tech:** Angular, TypeScript, RxJS, Bootstrap, REST APIs, Chart.js, Firebase Storage.
